# Welcome to Nexia

Welcome to Nexia International. I am delighted that we have risen one place since last year to become the eighth largest global network of independent accounting and consulting firms. In 2020, Nexia’s total fee income was USD4.5bn across the network - an increase of 5% on 2019.

This brochure provides an overview of our network and the range of services offered by Nexia International member firms, including audit, accounting, tax and advisory services.

It includes several case studies that showcase how Nexia member firms’ innovative and collaborative approach is helping their clients to succeed.

On the following pages we also explain more about Nexia International - who we are, what we do, where we work and the benefits we offer our members and their clients.

I, and the Nexia International team, look forward to working ‘Closer to you’.

Enduring relationships

Business minded

Globally connected

Nexia International works with its member firms leveraging strength across the network and enabling the delivery of global solutions by member firms to clients.

Nexia was established over 25 years ago. Our continued success is thanks to what lies at the heart of our business: international knowledge, proven experience and enduring relationships. This is reflected in our promise, 'Closer to you'. When you choose a Nexia member firm, you get a more responsive, more personal, partner-led service wherever you are in the world.

Our values define what we stand for:

- **We build enduring relationships**  
Our strength comes from the quality of personal relationships forged between members and members with their clients. This ensures greater trust, responsiveness and more effective delivery. Member firms communicate openly and clearly, which means there are no surprises when you work with a Nexia member firm. You are always supported by the right team with an experienced partner on every assignment, who is available for you. This helps members to think beyond the current assignment and invest in building long-term relationships.
- **We are business-minded**  
Our member firms are characterised by people who have an entrepreneurial spirit and who can relate closely to the small and medium sized enterprises and owner-managed businesses they serve. Our member firms think like business people, acting with a sense of purpose and bringing ideas to help their clients to develop and grow. They spend time listening so that they know you and are able to provide tailored advice, based on their deep understanding.
- **We are globally connected**  
Our member firms are internationally minded, focused on supporting local companies as they grow and help their clients to venture confidently into new international markets. They will connect you with the right people and deliver local accounting, tax, economic and market knowledge around the world.

# Commitment to quality

Our member firms share common values, which enable them to provide tailored solutions and high-quality advice across a wide portfolio of services.

Quality is embedded in everything we do at Nexia, from members developing valuable relationships with each other and their clients to the delivery of quality services by member firms across the world.

## **Recruitment of quality firms**

Before being admitted to the network all applicant firms are subject to an in-depth due diligence process which includes a review of procedures and completed engagements. Firms are then subject to an ongoing quality management process.

## **Network-wide audit quality**

Nexia's approach to network wide audit quality is based on members providing audit services to the highest standard with a minimum expectation of compliance with the International Standards on Auditing and the IESBA Code of Ethics.

Furthermore, the Nexia Independence Monitoring tool (NIMO) supports member firms in complying with the independence requirements of the IESBA Code of Ethics.

## **Nexia's common global audit methodology; Nexia Advance**

Nexia provides members with the option of adopting its cloud-based common global audit methodology. Nexia Advance is compliant with the International Standards of Auditing and is designed to ensure that audits are conducted in a consistent and efficient way, taking account of international standards and the latest best practice.

## **Committees and business groups**

Individuals across member firms can participate in over 20 committees and business groups, designed to help improve the quality of services to clients.

The committees and business groups do this through sharing local and global expertise, knowledge and best practices, developing guidance and templates to enable benchmarking and setting standards across jurisdictions as well as producing common methodologies and delivering specialist training.

Specialists work with you, to create tailored solutions and deliver a proactive approach to service delivery. Their partner led approach means they are focused on supporting you to achieve your business goals and growth ambitions.

Our member firms provide a range of audit and assurance services designed to identify, manage and respond to all types of risk.

To find out more about audit services, please contact Stephanie Market, at [audit@nexia.com](mailto:audit@nexia.com), Committee Chair of Audit services at Nexia International.

## Integrated reporting

Our member firms can apply global resources to support clients to produce much more than just a financial audit. We provide industry knowledge, awareness of international trends and sustainability reporting.

We ensure compliance with local and international standards, including requirements and guidance provided by The International Integrated Reporting Council (IIRC). The IIRC is a global coalition of regulators, investors, companies, standard setters, the accounting profession and NGOs. It promotes communication about value creation as the next step in the evolution of corporate reporting.

The IIRC's mission is to establish integrated reporting and thinking within mainstream business practice as the norm in the public and private sectors. Its vision is to align capital allocation and corporate behaviour to the wider goals of financial stability and sustainable development through the cycle of integrated reporting and thinking.

The IIRC is leveraging the support of its partners - organisations like ours - to create the scale and pace to deliver a step change in adoption, so that integrated reporting becomes the global norm in the corporate reporting system.

At Nexia International, we have the global resources to support member firm clients to produce integrated reports, relevant to their business and local and international requirements.

## Assurance

### Audit

Our member firms provide audit services based on the relevant regulatory requirements of their jurisdiction. We apply strict principles to how our members conduct their audit work. We keep them updated on developments in audit standards, and use rigorous quality control procedures to ensure that they are performing to the highest standards.

### Corporate governance and risk advisory

Member firms work closely with public, private and not-for-profit organisations. Member firms' expertise spans regulatory compliance, internal audits, fraud risk assessments, internal control reviews, information security risk assessments and policy and procedure development services.

### Quality of earnings due diligence

Our member firms work with corporate vendors, purchasers and sellers to meet the needs of private equity houses, banks and corporate acquirers and sellers. Member firms' expertise in this area includes:

- Financial, commercial, operational, tax, human resources, technology and corporate finance quality of earnings due diligence.
- Acting as reporting accountants to companies seeking admission to public markets.

## IFRS

### International Financial Reporting Standards (IFRS)

The IFRS continue to present significant challenges in preparing and using financial statements. Our member firms' expertise and experience in applying the standards enables clients to enjoy seamless and stress-free delivery.

Taxation is becoming increasingly complex, making it easy to pay too much tax, file incorrect accounts or miss tax benefits. Our member firms provide timely and high quality tax advice and support.

#### Corporate and business tax

Our global reach enables member firms to provide an extensive portfolio of cross-border tax consulting services, making them an ideal partner for international businesses. They can support you in everything from tax compliance to tax planning and tax advisory issues. They are kept informed by our business groups, who oversee industry topics and developments - including BEPS, FATCA, the Common Reporting Standard, e-commerce, transfer pricing and the taxation of expatriates.

#### Global mobility

Are you looking for practical logistical advice or expatriate tax planning on all aspects of moving between different countries? Member firms work with businesses who relocate employees overseas, and with individuals on their financial management and tax issues, including pre-departure and subsequent return tax planning and compliance. Let Nexia member firms take the complexity out of tax challenges and legislation, whether you operate in one or several locations.

#### Transfer pricing

Cross-border transactions are coming under increasing scrutiny from tax authorities - making it vital that you know what specific taxation authorities require. Non-compliance with transfer pricing legislation can result in having to pay interest on late tax payments - plus substantial penalties. Our member firms transfer pricing specialists will help you to create a robust transfer pricing policy, so you can protect the profit margins on related party transactions.

#### Indirect taxes

**Value Added Tax (VAT)**, or Goods and Services Tax (GST), exist in over 160 countries around the world today, and the number of countries adopting this IMF and OECD "tax of choice" is continuing to grow. Although the principles of these tax regimes are all similar, at a national level, almost every country implements the legislation slightly differently.

Our members advise inbound businesses on the indirect tax issues of operating in another country, as well as on cross-border transactions and the areas to avoid.

#### Private clients

Member firms provide **private tax and financial planning** for business owners, executives and individuals to help identify financial goals and preserve their wealth. They will create a tailored plan to make the best use of your assets and ensure financial success for you, your family and your business.

Member firms **wealth management** expertise includes:

- Managing cash flow and debt.
- Reducing tax liabilities.
- Identifying tax planning opportunities.
- Improving an investment portfolio.
- Charitable giving.
- Retirement provision.
- Advice on the use of offshore and other specialist trusts and tax saving vehicles.

#### International tax

Complying with international tax laws demands time, effort and expertise - particularly as the risk of non-compliance has increased significantly in recent years. Selecting the correct international tax structure for your business may include managing cash and compliance challenges. Using a service company and/or a holding company and applying appropriate tax structuring and transfer pricing policies can help you to manage your tax planning effectively.

Member firms can evaluate the key components in international tax structures, ensuring compliance with your tax obligations and global supply chains. We can also advise on the use of specialist company structures and the choice of appropriate jurisdictions.

Our member firm experts can advise on:

- Corporate income taxes.
- Indirect taxes.
