Nexia SAB&T
accountants | auditors | consultants

AUTOMATE YOUR PROCESSES. PROPEL YOUR BUSINESS.
With the world's #1 Intelligent Automation platform

RPA is the use of a 'robot' (software) that replicates the actions of a human being interacting with the user interface of a computer system. Robotic Process Automation is productivity software that sits on top of existing systems and performs manual, repetitive, and rule-based activities traditionally performed by individuals.

Nexia-SAB&T is a licensed partner of the RPA Platform

DISCOVERY BOT
Accelerate your automation pipeline with AI-driven process discovery

Automatic process discovery, also called task mining, is a technique to uncover business processes by recording user interactions with various systems, including enterprise solutions (ERP, CRM, BPM, ECM, etc.), personal productivity applications (Microsoft Excel, Outlook, etc.), and terminal and virtual environments. Unlike process mining that reconstruct processes using the data from event logs generated by enterprise solutions, process discovery captures user interactions with any application. It records necessary data such as mouse movements, clicks, etc. for identifying RPA opportunities and automatic creation of bots.

Discover - Record user activities, identify and document processes

Prioritize - Find high-value automation opportunities, manage automation pipeline

Automate - Convert automation opportunities into bots in one-click111

IQ BOT
Use AI to intelligently process your documents

IQ Bot combines the power of RPA with AI technologies such as Computer Vision, Natural Language Processing (NLP), fuzzy logic and machine learning (ML) to automatically classify, extract and validate information from business documents and emails.

PRE-PROCESSING - Improve document quality using noise reduction, binarization, de-skewing techniques

CLASSIFICATION - Classify and separate multi-page documents to identify relevant pages

EXTRACTION - Use ML technologies to extract specific data from documents

POST-PROCESSING - Validate using rules and AI-driven techniques to improve the extraction results

BOT INSIGHT
RPA analytics in real time at the bot, and business levels.

RPA ANALYTICS THAT TELL THE WHOLE STORY

Bot InsightTM is the only analytics platform to deliver both operational and business intelligence, in the moment.

YOUR SOFTWARE ROBOTS AREN'T JUST WORKING TIRELESSLY TO GET THINGS DONE, THEY HAVE A STORY TO TELL

Big Data goes with the territory. Your digital workforce is bringing back complete information on not only what it does but also what it encounters along the way. Everything is recorded and visible to the enterprise, anytime. But what does it all mean? The most advanced RPA analytics reveal what's meaningful and predict what's next.

SEE THE DIFFERENCE LET'S BEGIN.

HANDS-FREE BUSINESS ANALYTICS - Advanced analytics at the click of the mouse. Simply tag the variables of interest and we do the rest. It's a complete turnkey RPA analytics solution that requires no integration – everything is built-in (native) and ready right out of the box.

REAL-TIME OPERATIONAL INSIGHTS - With actionable intelligence, delivered by self-measuring bots, operations managers and practitioners can constantly monitor the efficiency and effectiveness of their digital workforce and easily quantify processes' operational performance on demand.

SEAMLESS INTEGRATION - Out-of-the box customizable analytics are designed for meet the analytics needs of most enterprises. With seamless integration into leading BI solutions Bot Insight offers unprecedented flexibility in measuring your digital workforce performance.

BENEFITS OF LEVERAGING A DIGITAL WORKFORCE

Optimize labor costs, increase capacity

Increase speed (5-10x), accuracy (100%) and availability (24x365)

Flexible and Scalable Workforce – 24x7x365 coverage

Improve compliance, controls and auditability

Deliver Real-Time Analytics and business intelligence

Enable digital transformation

Enhance employee morale

SOLUTIONS

BY INDUSTRY

Tailor to the unique needs of your industry

- BPO
- Financial Services
- Healthcare
- Telecom
- Insurance
- Life sciences
- Manufacturing
- Public Sector

BY FUNCTION

Create efficiencies in every department.

- Back Office Solutions
- Front Office Solutions
- Finance & Accounting
- Human Resources

BY TECHNOLOGY

Create efficiencies in every department.
